Related Tools: Chrome-Dev-Tool, VS Code, Git & GitHub, Firebase, Figma

➤ Project Showcase

1. Project Name: Result Management System (RMS)

[Live Site](#) [Frontend](#)

Abstract: a web app for creating and managing student results in educational institutions automates the result data handling for efficiency. [App Credential: **username:** teacher-one@gmail.com || **password:** 18102900]

Features:

- Streamline result management with user authentication, session, and course creation.
- Facilitate efficient mark entry and updates, including PDF generation for result sheets.
- Enhance accessibility with intuitive search and filtering functionalities.

2. Project Name: Job Portal Application (Hunter)

[Live Site](#) [Frontend](#) [Backend](#)

Abstract: it enables user management, job posting, application submission, and acceptance/rejection. [App Credential: **username:** admin1@gmail.com || **password:** 12345678]

Features:

- Applicant Profile Management: Users can update their profiles and view their applied jobs.
- Recruiter Job Management: Recruiters can do CRUD operations of a Job and also review applications.
- User Role Control: Administrators manage user roles, including recruiter settings.

3. Project Name: News Portal Application (Xpress)

[Live Site](#) [Frontend](#)

Abstract: a dynamic news hub on Next.js, offering hot news, updates, categories, and interactive articles.

Features:

- Daily Hot News: Curated selection of daily trending updates.
- Category-wise Navigation: Easily find and explore news articles by category.
- Hot News Ticker: Real-time updates on the hottest news stories with comments.
